1 Model-driven development of Web applications: the AutoWeb system 80%

Piero Fraternali , Paolo Paolini

ACM Transactions on Information Systems (TOIS) October 2000

Volume 18 Issue 4

This paper describes a methodology for the development of WWW applications and a tool environment specifically tailored for the methodology. The methodology and the development environment are based upon models and techniques already used in the hypermedia, information systems, and software engineering fields, adapted and blended in an original mix. The foundation of the proposal is the conceptual design of WWW applications, using HDM-lite, a notation for the specification of structure, nav ...
